Professional Summary

Innovative **Full Stack Engineer** with expertise in building scalable SaaS architectures, real-time distributed systems, and AI-driven automation. Proven track record of managing **VPS infrastructure**, delivering 10x performance optimizations, and generating **2L+ revenue** through self-led startup projects and digital agency leadership.

Education

Jain College Of Engineering, Belagavi — Aug. 2023 – Present
Bachelor of Engineering in Computer Science (Pursuing) — *CGPA: 8.75*

Kendriya Vidyalaya K. Road, Ahmednagar — 2020 – 2022
Higher Secondary Education (Class XII) — *Percentage: 85.5%*

Experience

Co-Founder & Technical Lead — Sept 2024 – Present
Autonoms Agency — *Remote*

- Spearheaded technical roadmap for a digital agency, delivering **4+ enterprise-grade web solutions** using Next.js and Node.js.
- Architected high-conversion landing pages resulting in **2L+ INR revenue** and a **30% average boost in organic SEO rankings** for clients.
- Implemented automated CI/CD pipelines and performance monitoring, reducing client site load times by 45%.

Software Developer (Independent Projects) — Jan 2023 – Aug 2024
Startup Labs — *Remote*

- Engineered **ThinkSoul LMS**, optimizing backend logic to handle **400+ concurrent projects** on a single-core VPS.
- Developed **COSEM**, an AI-integrated quotation engine for industrial setups, digitizing workflows for 3 major hydraulic firms.
- Collaborated on logistics supply-chain solutions, ranking **4th nationally** in the InnovateX E-Summit at IIT Bombay.

Key Projects

ThinkSoul LMS | *Next.js 15, Supabase, Tailwind CSS v4, Capacitor, Nginx, PM2*

- Architected a **Multi-tenant SaaS** learning platform featuring real-time document synchronization and interactive Kanban boards.
- Optimized VPS infrastructure using **Standalone Builds** and **Nginx Reverse Proxying**, achieving 99.9% uptime and sub-second page loads.
- Deployed a cross-platform mobile shell with **Over-the-Air (OTA) updates**, bypassing app store latency for critical system patches.

Zorabase Real-time Cloud | *Python, Redis, Multi-threading, WebSockets, Firebase Auth*

- Engineered a high-performance Firebase alternative supporting **1500+ concurrent connections** via optimized multi-threading.
- Implemented a **real-time security rules engine** and custom WebSocket-based data synchronization for zero-latency updates.
- Built a centralized monitoring dashboard to track system health, active socket connections, and storage metrics.

COSEM Industrial AI | *Electron.js, Node.js, AI Integration, JSON DB*

- Reduced industrial quote generation time from **7 days to 5 minutes** using custom complex data models and AI-driven cost prediction.
- Deployed a secure, offline-capable desktop solution for sensitive hydraulic manufacturing environments.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3, C++
Frameworks: Next.js 15+, React 19, Node.js, Capacitor (Mobile), Electron.js, Recharts, BlockNote
Backend & Cloud: Supabase, PostgreSQL, Redis, Firebase, Nginx, PM2, AWS S3, Capgo (OTA), RESTful APIs
Tools & OS: Linux (Ubuntu), Git/GitHub, Docker, SEO Analysis Tools, VPS/Domain Management
Core Competencies: SaaS Architecture, Real-time Systems, SEO Optimization, Database Design, Mobile Shell Dev
